

FIRST CHOICE INGREDIENTS

First Choice Ingredients... *Where flavor begins*

First Choice Ingredients was established in April, 1994 as a provider of ingredients to the seasoning and baking industries. The management quickly realized the market opportunities for competitively priced Dairy Based Flavors for the food industry. In 1997, the company expanded to vertically integrate the development, manufacturing, and distribution of its products. We currently manufacture all of our ingredients at the Germantown, Wisconsin facility.

First Choice Ingredients (FCI) has recently completed phase one of our aggressive expansion plan. In 2002, we opened a new 23,000 square foot research and manufacturing facility. Phase II of the expansion, finished in fall 2006, offers us more than 35,000 sq. ft. of production and storage capabilities. FCI continues to reinvest in additional reaction vessels and the expansion of our dry blending capacity. The investment will allow us to implement new technologies and enhance our overall capabilities of providing customers with unparalleled products and outstanding customer service.

At First Choice Ingredients, we manufacture a complete line of dairy concentrates derived through a unique fermentation process which eliminates the bitter and soapy notes often associated with EMC's. This process was designed to provide the richness and flavor of butter, cream and cheese flavors in a healthy and economical form. The strong natural flavor components of cheese, butter and cream are concentrated into a paste or spray dried to form a water soluble powder. The result is a natural concentrated form of milk, yogurt, butter, cream and cheese with flavor strength up to 100 times stronger than its original form.

FCI is recognized as a market leader of concentrated dairy ingredients derived through fermentation and reaction technologies. We are proud to be one of the few companies worldwide to focus on dairy flavors and components. Starting with quality raw materials, we add considerable know-how from our dedicated R&D staff to build cutting edge products, thus providing our customers with innovative dairy ingredient tools for further product development.

When your new product development calls for a customized dairy component, make the right choice. First Choice Ingredients . . . where flavor begins.
